BOSTIK FIREBAN ONE AND PROTECTO SUPER STICK BUILDING TAPE

Many building tapes traditionally used during building to provide air/vapour barriers around openings like doors and windows are subject to migration of components (e.g. bitumen) which precludes the use of sealants direct onto these building tapes. Protecto Super Stick Building Tape does not have any of these components and therefore allows the use of sealants directly onto the tape.

As Bostik Fireban One falls into the same product family as Bostik Seal 'N Flex 1 the use of Fireban One over Protecto Super Stick Building Tape is expected to achieve full product performance characteristics based on results achieved on Bostik Seal 'N Flex 1.

Yours sincerely,

A handwritten signature in blue ink that reads "Monique Parsler". The signature is written in a cursive, slightly slanted style.
