

## Product data sheet – DrainTec + DrainTec Clip + Systemprofile EVO

## DrainTec + DrainTec Clip in combination with Aluminium Systemprofile EVO

With the development of the DrainTec- drainage grate we are dedicated to the topic:

## Drainage for façade and deck surfaces.

The DrainTec drainage grate focuses on the detailed aspects of how these surfaces connect to building openings, e.g. areas that connect to doors or transitions from vertical façade surfaces to horizontal deck surfaces.

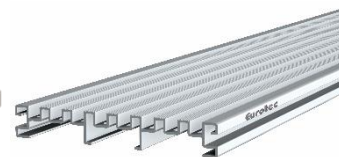

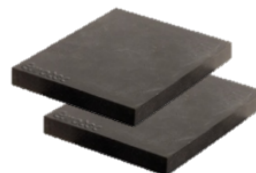

Its special geometry allows it to trap the rain so that the water falls directly onto the weatherproof layer, or into the gutter, without covering the door element or the façade cladding with reflected water (backsplash). Even heavy rain is drained in a controlled manner.

The flat geometry (21 x 140 mm) allows the grate to be combined with standard deck boards or fine stoneware slabs.

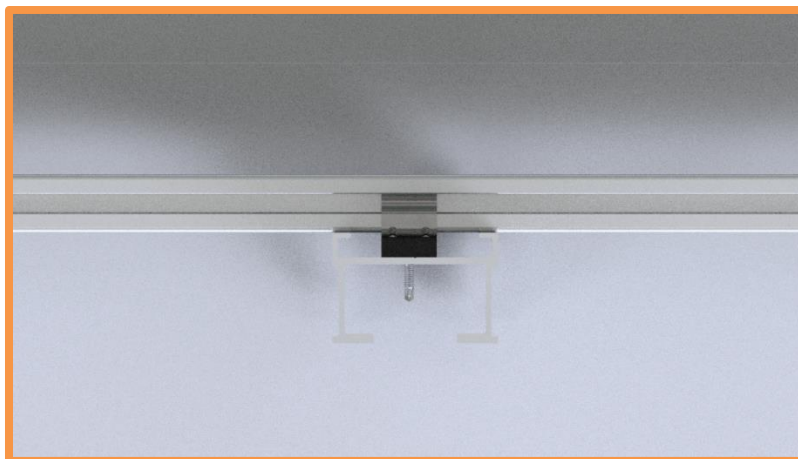

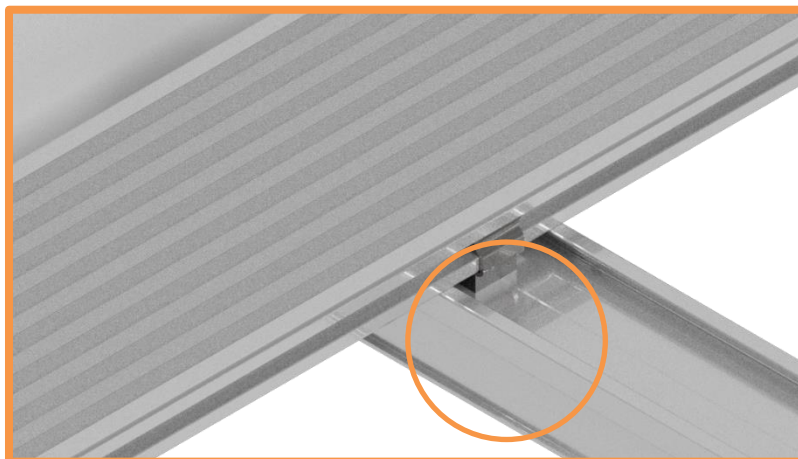

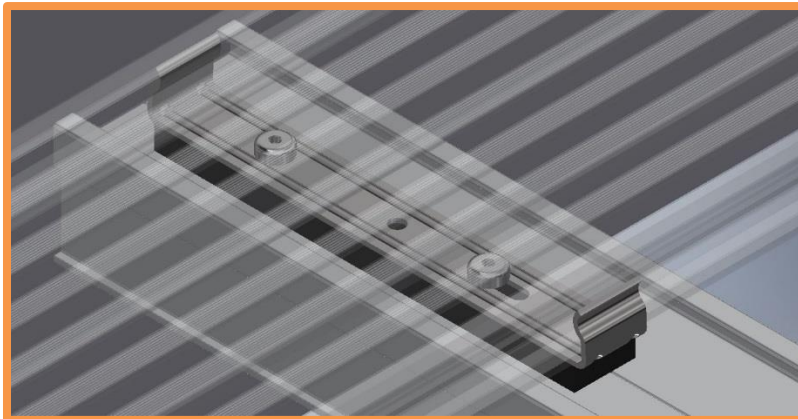

## Example of application

DrainTec + Systemprofil EVO			
Art.-No.	Description	Dimension (mm)	PU
975634	Alu Drainage grating DrainTec	21 x 140 x 4000	1
975635	DrainTec Clip	1,5 x 16,5 x 144	2
954053	Bighty PH	4,8 x 25	50
975610	Systemprofile EVO	40 x 60 x 4000	1
945379	Rolfi EPDM Pad	60 x 60 x 10	25
